No. is the number of results predicted by chance to have a score greater.than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                       105
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Description
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    23, 7

Patent No. 7115560;
GENERAL INFORMATION:
TITLE OF INVENTION:
TITLE OF INVENTION: Methods For Modulating Gastric Secretion
TITLE OF INVENTION: Using Prokineticin Receptor Antagonists
TITLE OF INVENTION: Using Prokineticin Receptor Antagonists
CURRENT APPLICATION NUMBER: US/10/811,328
CURRENT FILING DATE: 2004-03-25
PRIOR PELLING DATE: 2003-03-25
NUMBER OF SEQ ID NOS: 32
NUMBER OF SEQ ID NOS: 32
